THE BESTMINDS OAC METHOD

3 steps to answer open-ended PSLE Science questions

O

OBSERVE CAREFULLY

Spot the evidence in the question, diagram or data.

A

ANALYSE LOGICALLY

Connect the evidence to the correct Science concept.

C

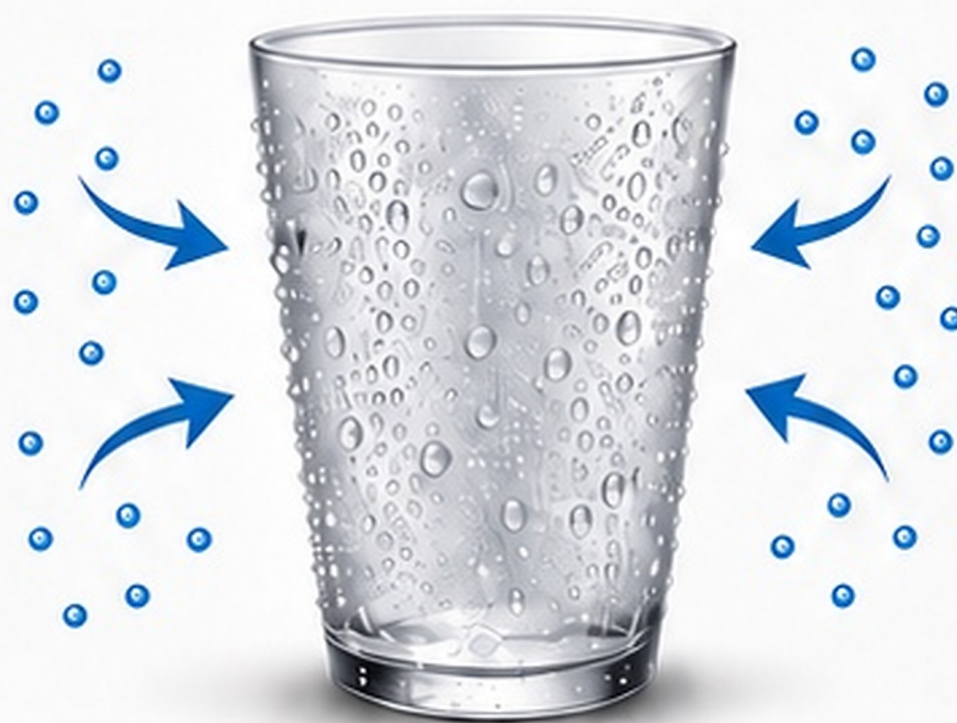

COMMUNICATE CLEARLY

Construct a clear answer using the relevant scientific concept and evidence.

EXAMPLE

Why did water droplets form outside a cold cup?

OBSERVE

Droplets formed on the cup's outer surface.

ANALYSE

Water vapour in the surrounding air lost heat and condensed.

COMMUNICATE

Water vapour in the surrounding air lost heat to the cold surface of the cup and condensed to form water droplets.

EVIDENCE

SCIENCE CONCEPT

CLEAR ANSWER
